

International Cement Information:

News, Statistics, Economic Data

PCA Library Reference Series No. 4 (LR04)

Major Sources

American Cement Directory. Annual. Bradley-Pulverizer.

Pocket-sized volume listing cement companies in the U.S., Canada, Central and South America and the Caribbean area. Also contains alphabetical listing of personnel in the U.S. and Canada. Listings include officers, annual capacity, kiln type. Order at <http://www.bradleypulverizer.com/cement.html>.

Cement Standards of the World, 8th ed., Cembureau, 1991.

A compendium of cement specifications from all countries. No updated edition is anticipated.

Global Cement Directory, 2007-2008. ProPublications International.

Annual listing of all cement plants worldwide. Includes contact information, kiln data, capacity, planned upgrades, and maps. <http://www.propubs.com/GCD/>.

Global Cement Report, 6th ed., International Cement Review, 2005.

A one-volume overview of the cement industry in each of 220 countries; production, consumption, major companies, economic conditions. Free with a subscription to *International Cement Review* magazine.

See: <http://www.cemnet.com>.

The Monitor. Monthly. Portland Cement Association.

This monthly electronic publication tracks trends in the construction, concrete, and cement industries.

Updates of cement consumption at the national and state levels, construction activity at the national and state levels, semiannual forecasts for both U.S. and Canada, data on cement imports, updates on cement plant modernizations and ownership changes. U.S. and Canadian editions are both available. *Flash Reports* and *Tracking Reports* are included with a subscription. Contact: Karen Arneson, e-mail <mailto:arneson@cement.org>.

North American Cement Directory. Annual. Primedia.

Directory of cement companies in the U.S., Canada, Mexico, the Caribbean, and Central America.

Includes plant-specific data such as kiln type, fuel type, and contact information. Order at

<http://www.cementamericas.com>.

North American Cement Industry Annual Yearbook. Portland Cement Association.

The Yearbook provides long-term historical tables and graphs for indicators most relevant to the cement industry. Sections include the economic environment, cement consumption and supply, industry operating characteristics, and international. Detailed historical data is provided on construction activity, company rankings, import trends, and energy consumption. The report is in pdf and may be purchased and downloaded at <http://www.cement.org/Bookstore>.

U.S. Geological Survey, *Cement Statistics and Information*.

Monthly and annual data on U.S. cement production and consumption. Free at

<http://minerals.usgs.gov/minerals/pubs/commodity/cement>

U.S. & Canadian Portland Cement Industry: Plant Information Summary. Annual. Portland Cement Association.

This annual volume contains comprehensive information on plant capacities and the types of cement produced, capacity ranking tables by company, state, and plant, mill and kiln data, and detailed information of fuel types used, including waste fuels. Plant locations, parent company listings, and company ranking tables are included. A map of plant locations is located in the back of the book. The volume may be purchased at <http://www.cement.org/Bookstore>.

World Cement Directory, 11th ed., Cembureau, 2002.

Available both in printed and CD versions, this is the most comprehensive directory of worldwide cement plants. Data includes cement types produced, mill type, capacity, kiln type, cooler type, fuels, number of employees, and other data. Order at <http://www.cembureau.be>.

World Statistical Review. Annual. Cembureau.

The information in this CD-Rom covers practically all the countries in the world and provides data on cement production, imports, exports, total and per capita consumption and population. This edition was issued in January 2007 and contains data from 1996 – 2005. Order at <http://www.cembureau.be>
