### Description of the County and Market Group Report

The Apparent Use of Portland Cement by County and Market Group Report will be available in October following the report year. It follows the format of this fictitious example for the state of Arizona.

This report provides the best industry estimates for each of twelve market classifications and the most up-to-date estimates of county totals for the report year. It uses annually revised usage factors for many markets and states, and new estimates for non-contract construction. Much of the data needed for this degree of accuracy are not available until late July or August, hence the October publication date. The state totals presented equal the U. S. Bureau of Mines totals for shipments by state of destination.
