

PENNSYLVANIA: Cement Industry Impact

PLANT LOCATIONS

PENNSYLVANIA ECONOMIC DATA*

- Cement and related economic contribution to state: **\$5.06 billion**
- Cement and related employees: 6,334 with a payroll of **\$421.5 million**
- Cement employees: 700 with a payroll of **\$56.3 million**
- Cement and related industries' contribution to state tax revenue: **\$123.7 million**
- Pennsylvania is the **6th largest** cement-producing state in the nation

**Data based on 2023 ACA Market Intelligence survey results*

PENNSYLVANIA SENATORS: John Fetterman (D) and Dave McCormick (R)

COMPANY	LOCATION	HOUSE MEMBERS
Amrize ¹	Whitehall	Ryan Mackenzie (R-7th)
Armstrong Cement & Supply Corp ¹	Cabot	Mike Kelly (R-16th)
Buzzi Unicem USA	Stockertown	Ryan Mackenzie (R-7th)
Giant Cement Holding ¹	Bath	Ryan Mackenzie (R-7th)
Heidelberg Materials	Nazareth	Ryan Mackenzie (R-7th)
Heidelberg Materials	Fleetwood	Madeline Dean (D-4th)
Lehigh White Cement ¹	York	Scott Perry (R-10th)

TERMINALS

Amrize¹, Pittsburgh, Summer Lee (D-12th)
Eagle Materials¹, Pittsburgh, Chris Deluzio (D-17th)
Heidelberg Materials, Evansville, Madeleine Dean (D-4th)
Heidelberg Materials, Nazareth, Ryan MacKenzie (R-7th)
Heidelberg Materials, Pittsburgh, Chris Deluzio (D-17th)
Heidelberg Materials, Adrian, Glenn Thompson (R-15th)
QUIKRETE Cement, Leetsdale, Chris Deluzio (D-17th)

Locations with terminals are indicated on the map with a black dot

American Cement Association, Representing America's Cement Manufacturers

The cement and concrete industry contributes approximately **\$130 billion to the U.S. economy** and directly and indirectly employs 577,000 people. It operates in every state in the continental U.S.

Concrete is formed when cement is mixed with water and aggregate (sand and rock) and allowed to harden. Cement is the glue that holds concrete together.

Concrete, the second most-utilized material in the world after water, sees an annual usage of about 260 million cubic yards in the U.S. In plain terms, that's 600 times the amount of concrete in The Pentagon—annually.

Concrete is used to build highways, bridges, airport runways, water and sewage pipes, high-rise buildings, dams, homes, floors, sidewalks, and driveways. Concrete's durability makes it the most disaster-resilient construction material available.

For decades, ACA member companies have invested millions of dollars in research and state-of-the-art technology to manufacture resilient and sustainable cement for use in construction.

The **American Cement Association** is the premier policy, research, education, and market intelligence organization serving America's cement industry. ACA supports sustainability, innovation, and safety while fostering continuous improvement in cement manufacturing, distribution, infrastructure, and economic growth.
