

COLORADO: Cement Industry Impact

PLANT LOCATIONS

COLORADO ECONOMIC DATA*

- Cement and related economic contribution to state: **\$2.6 billion**
- Cement and related employees: 3,417 with a payroll of **\$248.4 million**
- Cement employees: 309 with a payroll of **\$27.6 million**
- Cement and related industries' contribution to state tax revenue: **\$49.9 million**
- Colorado is the **10th largest** cement-producing state in the nation
- National cement employee average salary: **\$84,330**

*Data based on 2024 ACA Market Intelligence survey results

COLORADO SENATORS: Michael Bennet (D) and John Hickenlooper (D)

COMPANY	LOCATION	HOUSE MEMBERS
Amrize	Florence	Brittany Petterson (D-7th)
Cemex USA	Lyons	Joe Neguse (D-2nd)
GCC of America	Pueblo	Jeff Hurd (R-3rd)

TERMINALS

- Amrize**, Denver, Gabe Evans (R-8th)
- Amrize**, Fort Collins, Joe Neguse (D-2nd)
- Amrize**, Rifle, Jeff Hurd (R-3rd)
- Amrize**, Denver East, Gabe Evans (R-8th)
- Cemex USA**, Florence, Brittany Petterson (D-7th)
- Eagle Materials¹**, Denver, Diana DeGette (D-1st)
- GCC of America**, Denver, Gabe Evans (R-8th)
- GCC of America**, Irondale, Gabe Evans (R-8th)
- GCC of America**, Pueblo, Jeff Hurd (R-3rd)
- GCC of America**, Fruita, Jeff Hurd (R-3rd)

Locations with terminals are indicated on the map with a black dot

American Cement Association, Representing America's Cement Manufacturers

The cement and concrete industry contributes approximately **\$157 billion to the U.S. economy** and directly and indirectly employs 571,000 people. It operates in every state in the continental U.S.

Concrete is formed when cement is mixed with water and aggregate (sand and rock) and allowed to harden. Cement is the glue that holds concrete together.

Concrete, the second most-utilized material in the world after water, sees an annual usage of about 260 million cubic yards in the U.S. In plain terms, that's 600 times the amount of concrete in The Pentagon—annually.

Concrete is used to build highways, bridges, airport runways, water and sewage pipes, high-rise buildings, dams, homes, floors, sidewalks, and driveways. Concrete's durability makes it the most disaster-resilient construction material available.

For decades, ACA member companies have invested millions of dollars in research and state-of-the-art technology to manufacture resilient and sustainable cement for use in construction.

The **American Cement Association** is the premier policy, research, education, and market intelligence organization serving America's cement industry. ACA supports sustainability, innovation, and safety while fostering continuous improvement in cement manufacturing, distribution, infrastructure, and economic growth.
